SOVIET MATHEMATICS—DOKLADY

Translation edited by Ben Silver

A translation of the mathematics section of

ДОКЛАДЫ АКАДЕМИИ НАУК СССР

Издательство "Наука", 1990 г.

Each issue corresponds to one volume of the Soviet DOKLADY, which is issued three times a month, six issues constituting a volume.

SUBSCRIPTION INFORMATION. SOVIET MATHEMATICS—DOKLADY is published six times per year. Subscription prices for Volumes 42–43 (1991) are \$602 list, \$482 institutional member, \$361 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$9; subscribers in India must pay a postage surcharge of \$17. Expedited delivery to destinations in North America \$17; elsewhere \$40. Combination paper and microfiche subscription prices are \$801 list, \$642 institutional member. Microfiche of each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 1–20, \$452 list, \$362 institutional member; for Volumes 21–28, \$283 list, \$226 institutional member; for Volumes 29–30, \$297 list, \$238 institutional member; for Volumes 31–32, \$394 list, \$315 institutional member; for Volume 33, \$789 list, \$631 institutional member; for Volumes 34–35, \$424 list, \$339 institutional member; for Volumes 36–37, \$437 list, \$350 institutional member; for Volumes 38–39, \$441 list, \$353 institutional member; for Volumes 40–41, \$420 list, \$336 institutional member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.* Address changes and other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale.

Soviet Mathematics—Doklady is published six times per year by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second class postage paid at Providence, RI. Postmaster: Send address changes to Soviet Mathematics—Doklady, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

CONTENTS

Gadzhiev, A. G. <i>Statistical estimators in regression models</i>	1
Lazutkin, V. F. <i>On the width of the instability zone near the separatrices of a standard mapping</i>	5
Alekseeva, E. I. and Kirzhner, V. M. <i>Dependence of the stability of a set of dynamical systems on the structure of a coupling between them</i>	10
Boimatov, K. Kh. <i>Multidimensional systems of differential equations of composite type with nonsmooth coefficients</i>	14
Boltyanskii, V. G. and Soltan, P. S. <i>Solution of Hadwiger's problem for a class of convex bodies</i>	18
Borovikov, V. P., Borovikov, I. P., and Gaponenko, Yu. L. <i>On the method of regularization in the space of piecewise continuous functions</i>	23
Gabasov, R., Kirillova, F. M., and Kostyukova, O. I. <i>An optimization algorithm for nonlinear dynamical systems</i>	28
Dzhangibekov, G. <i>The Noether property and the index of a class of two-dimensional singular integral operators</i>	32
Kipriyanov, I. A. and Katrakhov, V. V. <i>On a boundary value problem for second-order elliptic equations in domains on the sphere</i>	37
Kovtunets, V. V. <i>Differentiability of the operator of best uniform approximation of complex-valued functions</i>	41
Kuz'min, E. N. <i>On a class of irreducible polynomials over a finite field</i>	45
Moiseev, E. I. <i>On the basis property of the eigenfunctions of a nonlocal boundary value problem</i>	49
Podol'skii, V. E. <i>On the recovery of the Sturm-Liouville operator from its weighted zeta function</i>	53
Bakhvalov, N. S. and Knyazev, A. V. <i>Efficient computation of averaged characteristics of composites of a periodic structure of essentially different materials</i>	57
Gavrilenko, Yu. V. <i>Primitive recursion on finitely decomposable Cooper algebras</i>	63
Din' Zung [Dinh Dung] <i>On the recovery and one-sided approximation of periodic functions of several variables</i>	68
Kapustin, N. Yu. <i>On unique solvability in the class L_2 of the Tricomi problem for a parabolic-hyperbolic equation with lower-order terms</i>	72
Levendorskii, S. Z. <i>An algebra of boundary value problems for a class of pseudodifferential operators of variable order</i>	77

Levchuk, V. M. <i>Central and derived series of certain subgroups of Chevalley groups</i>	82
Pesenson, I. Z. <i>The Bernstein inequality in representations of Lie groups</i>	87
Popov, L. Yu. <i>Justification of a model of slits of zero width for the Neumann problem</i>	91
Sukochev, F. A. and Chilin, V. I. <i>Symmetric spaces on semifinite von Neumann algebras</i>	97
Tumashev, Yu. S. <i>Determination of the convolution of inverse matrices defined in a class of functions of two variables</i>	102
Cherednichenko, V. G. <i>Estimates of the potential of masses, and solvability of the inverse problem</i>	107
Yunusov, M. Yu. <i>On junction problems for differential-operator equations with a small parameter</i>	112
Antonyuk, P. N. and Stanyukovich, K. P. <i>Periodic solutions of the logistic difference equation</i>	116
Boimatov, K. Kh. and Kostyuchenko, A. G. <i>Spectral asymptotics of polynomial pencils of differential operators</i>	120
Isachenko, N. A. <i>On uniformly quasiconformal discontinuous groups not isomorphic to Möbius groups</i>	125
Pogorelov, A. V. <i>Busemann G-spaces with Riemannian metric</i>	129
Shul'man, V. S. <i>Multiplication operators and spectral synthesis</i>	133
Antonyuk, P. N. and Stanyukovich, K. P. <i>The logistic difference equation. Period doubling and Fermat numbers</i>	138
Baltag, I. A. <i>Properties of symmetry elements of n-dimensional lattices in Minkowski space and in Euclidean space</i>	142
Belyaev, V. A. <i>A description of the structure of polynomial convergence sets in the complex plane</i>	146
Vu Kim Tuan <i>The modified Laplace transform and the multidimensional H-transform</i>	150
Gevorkyan, G. G. <i>On the uniqueness of trigonometric series summable by Riemann's method</i>	154
Erunova, I. B. and Rivkind, V. Ya. <i>On estimates of the rate of convergence of approximate methods of calculating the flow of a viscous incompressible fluid with a free surface in domains with corner points</i>	158
Zheludev, V. A. <i>An operational calculus connected with periodic splines</i>	162
Kalashnikov, V. V., Nosovskii, G. V., and Fomenko, A. T. <i>Statistical analysis of the star catalogue "Almagest"</i>	168
Korenevskii, D. G. <i>An algebraic coefficient criterion for convergence "with margin" (exponential stability) of solutions of linear time-invariant difference equations</i>	174
Korobeinik, Yu. F. <i>On some applications of nontrivial expansions of zero in the theory of convolution operators</i>	177
Kuchment, P. A. and L'vin, S. Ya. <i>The range of the exponential Radon transform</i>	183

Larionov, E. A. <i>Localization of eigenvalues and root vectors under a weak perturbation</i>	185
Malamud, M. M. <i>Boundary value problems for Hermitian operators with gaps</i> .	190
Maslennikova, V. N. and Timoshin, M. A. <i>On the L_p-theory for the Stokes problem in unbounded domains with compact boundary</i>	197
Mishchenko, S. P. <i>On varieties of solvable Lie algebras</i>	202
Ostapenko, V. V. <i>Approximation of conservation laws by through computation difference schemes</i>	206
Potapov, M. M. <i>On a stable method for solving an operator equation in the presence of a constraint</i>	211
Pokhozhaev, S. I. <i>On the solvability of an elliptic problem in \mathbb{R}^n with a supercritical index of nonlinearity</i>	215
Khanin, L. G. <i>Kantorovich-Rubinshtein duality for Lipschitz spaces defined by differences of arbitrary order</i>	220
Khisamiev, N. G. <i>Constructive Abelian p-Groups</i>	225
Yurko, V. A. <i>Recovery of differential operators from the Weyl matrix</i>	229
Table of Contents for the next issue (Vol. 42, No. 2, March–April 1991, Russian original Tom 314, nos. 1–6)	233-a

CONTENTS

Amiraliev, G. M. <i>On difference schemes for problems of the theory of dispersive waves</i>	235
Belitskii, G. R. and Tkachenko, V. A. <i>On locally analytic solvability of multidimensional functional equations in the neighborhood of a nonsingular point</i>	239
Bovdi, A. A. and Khripta, I. I. <i>The Engel property of the multiplicative group of a group algebra</i>	243
Borovoï, M. V. <i>On weak approximation in homogeneous spaces of algebraic groups</i>	247
Budaev, V. D. <i>A criterion for the unconditional basis property of systems of eigenfunctions and associated functions of ordinary differential operators</i> .	252
Varlamov, V. V. <i>On a hyperbolic equation describing wave processes in media with dispersion and absorption</i>	256
Varpakhovskii, F. L. <i>On the question of axiomatization of realizable propositional formulas</i>	260
Vodop'yanov, S. K. <i>Weighted L_p potential theory on homogeneous groups</i>	265
Geidarov, B. A. <i>On the stability of solutions of Volterra equations of the first kind of convolution type</i>	271
Golichev, I. I. <i>A three-level iterative method of Newton type</i>	275

Gudivok, P. M., Oros, V. M., and Roïter, A. V. <i>On representations of finite groups over a ring of formal power series with p-adic integer coefficients</i> ..	280
Zubov, V. I. <i>Ergodic behavior of macroparameters</i>	284
Ivanauskas, F. F. <i>Difference schemes for nonlinear equations of Schrödinger type</i>	287
Il'in, V. A. <i>On the Riesz basis property of systems of root vector-valued functions of a discontinuous Schrödinger operator with matrix potential</i>	292
Kalinin, A. I. <i>An asymptotic method of constructing optimal controls with singular intervals</i>	296
Kats, B. A. <i>On conditions for solvability of the Riemann boundary value problem on nonsmooth curves</i>	302
Kopachevskii, N. D. <i>Inversion of Lagrange's theorem on the stability of small oscillations of a capillary viscous liquid</i>	307
Korenevskii, D. G. <i>An algebraic coefficient criterion for exponential stability in the mean square of solutions of linear stationary stochastic difference equations</i>	310
Kreïn, S. G. and Fomin, V. I. <i>Small perturbations of singular differential equations with unbounded operator coefficients</i>	313
Kruzhkov, S. N. and Panov, E. Yu. <i>Conservative quasilinear first-order laws with an infinite domain of dependence on the initial data</i>	316
Kuzin, I. A. <i>On a variational method of finding critical points of a functional, and its application</i>	322
Leonov, A. S. <i>On the theory of the minimal pseudoinverse matrix method</i>	327
Mal'kov, K. V. <i>A nonselfadjoint L-A representation for certain nonlinear nonlocal problems</i>	333
Mel'nik, V. S. <i>On extremal problems for differential-operator systems</i>	340
Men'shikh, O. F. <i>On the Cauchy problem and boundary value problems for a class of systems of quasilinear hyperbolic equations</i>	346
Monastyrnyi, A. P. and Yanchevskii, V. I. <i>Whitehead groups of algebraic groups of classical type, and R-equivalence</i>	351
Pogorelov, A. V. <i>Regular Busemann G-spaces</i>	356
Radkevich, E. V. <i>Asymptotic expansions of solutions of parabolic boundary value problems with a free boundary</i>	360
Ryshkov, S. S. and Ėrdal [Erdahl], R. M. <i>Dual systems of integer vectors and their applications</i>	366
Sagitov, S. M. <i>A Bellman-Harris branching process starting with a large number of particles</i>	372
Satimov, N. Yu. <i>On methods of solving game problems of control of pencils of trajectories</i>	376
Solov'ev, V. N. <i>Duality of nonconvex extremal problems</i>	380
Strugov, Yu. F. <i>On the continuity of p-capacity</i>	384
Tkachev, V. G. <i>Some estimates of the mean curvature of graphs over domains in \mathbb{R}^n</i>	387
Tulyaganov, S. T. <i>Sums of multiplicative functions</i>	391
Finogenko, I. A. <i>Functional-differential inclusions on closed subsets</i>	395

Kharatishvili, G. L. and Tadumadze, T. A. <i>Regular perturbations in optimal control problems with variable delays and a free right end</i>	399
Chirkunov, Yu. A. <i>Group classification of systems of first-order linear differential equations with two unknown functions of two variables</i>	404
Shelkovich, V. M. <i>An associative algebra of distributions and multipliers</i>	409
Yarakhmedov, G. Ya. <i>On Tchebycheff approximation by generalized rational fractions in the space of \mathfrak{N}-bounded real-valued functions</i>	415
Bobylev, N. A. and Krasnosel'skii, M. A. <i>On bifurcation of the extremals of variational problems</i>	420
Bogolyubov, N. N., Mikityuk, I. V., and Prikarpat'skii, A. K. <i>Verma modules over the quantum Lie algebra of currents on the circle</i>	424
Derkach, V. A. and Malamud, M. M. <i>The resolvent matrix of an Hermitian operator and a moment problem with gaps</i>	429
Evtukhov, V. M. <i>Asymptotic integration of linear systems of differential equations in the case of quasi-Jordan normal form of the principal coefficient matrix</i> ..	436
Zubov, V. I. <i>A finite-dimensional characterization of probability distributions</i> ..	441
Karapetyants, N. K., Murdaev, Kh. M., and Yakubov, A. Ya. <i>On an isomorphism implemented by fractional integrals in generalized Hölder classes</i> ..	446
Kurzhanskii, A. B. and Sivergina, I. F. <i>On nonreversible evolution systems: guaranteed estimation and regularization problems</i>	451
Nikolaevskii, Yu. A. <i>Submanifolds of Euclidean space with totally geodesic Gauss image</i>	456
Sabitov, K. B. <i>Inversion of some integral equations of Volterra type</i>	460
Sadybekov, M. A. <i>On the adjoint Darboux problem</i>	464
Fedotov, A. M. <i>A numerical algorithm for extrapolating functions of Wiener class</i> ..	467
Fonf, V. P. <i>Topological properties of subsets and linear-topological properties of Banach spaces</i>	471
Agranovich, Yu. Ya. and Sobolevskii, P. E. <i>The motion of a nonlinear viscoelastic fluid</i>	474
Anulova, S. V. <i>Functional limit theorems for semimartingales in a polytope, and their applications for queueing networks</i>	479
Vaskes, Khuan L. [Jaun L. Vázquez] and Galaktionov, V. A. <i>Asymptotic behavior of solutions of a nonlinear diffusion-absorption equation with critical exponent</i>	484
Gogatishvili, A. S., Kokilashvili, V. M., and Krbets [Krbec], M. <i>Maximal functions in the classes $\phi(L)$</i>	488
Gol'dberg, V. N. <i>On the well-posedness of the formulation of mixed problems for almost linear hyperbolic systems with two independent variables in a class of discontinuous solutions</i>	491
Gurvich, V. A. <i>A saddle point in pure strategies</i>	497
Korolyuk, V. S. and Borovskikh, Yu. V. <i>U-statistics with increasing degrees</i> ...	502
Nazarov, V. I. <i>Solvability of linear differential-operator equations in Roumieu scales constructed with respect to a given unbounded linear operator</i>	507
Nikol'skii, S. M. <i>Traces of entire functions of exponential type on manifolds</i> ...	511

Pokhozhaev, S. I. <i>On classes of positivity of elliptic operators in \mathbf{R}^N with a supercritical index of nonlinearity</i>	515
Rzaev, R. M. <i>A multidimensional singular integral operator in spaces defined by conditions on the mean oscillation of functions</i>	520
Sabinin, L. V. <i>On smooth hyporeductive loops</i>	524
Kheifits, A. I. <i>Distribution of values and representations of generalized subharmonic functions</i>	527
Godun, B. V. and Troyanski, S. L. <i>Operators attaining their norms, and the geometry of the unit sphere of a Banach space</i>	532
Zubov, V. I. <i>Integral equations for the Lyapunov function</i>	535
Kostrikin, A. I. and Fam Khy'u T'ep [Pham Huu Tiep] <i>Irreducible orthogonal decompositions of simple Lie algebras of type A_n</i>	538
Nikol'skii, S. M. <i>Approximation on a manifold by traces of functions of exponential type</i>	543
Pogorelov, A. V. <i>Solution of a problem of H. Busemann</i>	547
Ul'yanov, P. L. <i>On properties of functions in the Gevrey classes</i>	550
Azarin, V. S. and Giner, V. B. <i>On multipliers of entire functions of finite order</i>	555
Boimatov, K. Kh. <i>Asymptotic behavior of the Green function of parabolic equations and of the kernels of complex powers of the resolvent of elliptic operators</i>	559
Vorob'ev, N. N., Jr. and Grigor'ev, D. Yu. <i>Determination of the number of connected components of a semialgebraic set in subexponential time</i>	563
Gordon, E. I. <i>Hyperfinite approximations of locally compact abelian groups</i> ...	567
Groshev, L. N. <i>Spaces of almost periodic functions of infinite order and theorems on the solvability of nonlinear equations</i>	572
Dzhabbarov, I. Sh. <i>On an identity of harmonic analysis and its applications</i> ...	577
Dzhangibekov, G. <i>On a class of two-dimensional singular integral operators</i> ...	580
Egorov, Yu. V. and Nguen Min' Chi [Nguyen Minh Tri] <i>Maximally hypoelliptic operators with noninvolutory characteristic set</i>	585
Iskenderov, A. D. <i>On conditional well-posedness of problems with an unknown boundary of the domain</i>	588
Le Khong Van [Le Hong Van] <i>Globally minimal homogeneous spaces in regular orbits of the adjoint representation of classical Lie groups</i>	592
Makarov, B. M. <i>A characterization of universally regular operators and operators with regular commutators</i>	596
Oganesyan, A. O. <i>Construction of hyperbolic equations with variable coefficients, satisfying Huygens' principle</i>	600
Prilepko, A. I. and Vasin, I. A. <i>Some time-dependent inverse problems of hydrodynamics with final observation</i>	604
Ragimov, M. B. <i>Operator pencils and almost periodicity of bounded solutions of second-order differential equations</i>	608
Tomchin, I. L. and Yanchevskii, V. I. <i>On the defect of a valuation division ring</i>	612
Chentsov, A. G. <i>Asymptotic effectiveness and extensions in the class of finitely additive measures</i>	615

Amirov, R. Kh. <i>On uniqueness of a solution of the Cauchy problem for an ultra-hyperbolic equation</i>	619
Arutyunov, A. V. <i>On the theory of quadratic mappings in Banach spaces</i>	621
Bakaev, N. Yu. <i>On the well-posedness of difference schemes with generalized initial data</i>	624
Boikov, I. V. <i>On the stability of solutions of differential and difference equations in critical cases</i>	630
Golodets, V. Ya. and Voevoda, I. V. <i>Borel parametrization of Polish groups and Lie groups</i>	633
Zaidenberg, M. G. <i>Ramanujam surfaces and exotic algebraic structures on \mathbb{C}^n, $n \geq 3$</i>	636
Kapustin, N. Yu. and Sabitov, K. B. <i>The Riccati equation in the theory of equations of mixed type</i>	641
Krot, A. M. <i>On the multiplicative complexity of bilinear forms for which the Vandermonde transformation is an eigentransformation</i>	646
Obraztsov, I. F., Gvishiani, A. D., and Gurvich, V. A. <i>Computation of schemes by "rudder" and "ladder" algorithms</i>	651
Radkevich, E. V. <i>On the spectrum of the pencil of the two phase Stefan problem</i>	658
Rapinchuk, A. S. <i>The congruence problem for arithmetic groups of finite width</i>	664
Ronkin, L. I. <i>Subharmonic functions of completely regular growth in a closed cone</i>	669
Sarychev, A. V. <i>On homotopy properties of the space of trajectories of a completely nonholonomic differential system</i>	674
Semenov, E. M. and Shteinberg, A. M. <i>The Orlicz property of symmetric spaces</i>	679
Seregin, G. A. <i>On the regularity of weak solutions of variational problems in plasticity theory</i>	683
Strunkov, S. P. <i>On the characters of minimal p-defect in finite groups</i>	689
Umarov, Kh. G. <i>The Cauchy problem in a Banach space for an analogue of the diffusion equation not solved for the time derivative</i>	693
Table of Contents for the next issue (Vol. 42, No. 3, May-June 1991, Russian original Tom 315, nos. 1-6)	697-a
